

## Training Young Men and Women to Rightly divide the Word of Truth and Equipping them for Service to God

Join us next semester as we embark on a new learning adventure at Heritage Home School Workshops. Together, we'll trudge through the Dark Ages, battle in the Crusades, marvel at the Renaissance, and breathe the fire of the Reformers—all within the borders of a Christian Classical approach to education!

Using Diana Waring's acclaimed *Romans, Reformers, & Revolutionaries* as our foundation—augmented by what we believe to be some of the finest literature and language arts curriculum (see list)—we will read, write, and discuss our journey through the fall of Jerusalem . . . to the discovery of the new world.

Along the way, we will create historical timelines, notebooks, and maps, listen to period music, appreciate amazing art, and meet world-changing heroes and villains who will come to life through invigorating biographies and dramatic historical fiction.

When combined with math, science, and electives offered elsewhere at Heritage Home School Work Shops, this Christian Classical approach offers your children a complete curriculum:

Spelling, Handwriting, Reading,  
Grammar, Intensive Writing, Speech,  
Geography, History, Art & Music Appreciation,  
Latin & Literature!

We designed this course with families in mind!!!

*"Come now, let us reason together..."* (Isaiah 1:18) We chose read-alouds to spark lively family discussions and create natural opportunities for parents to share core beliefs and values. And, whenever possible, siblings will study the same persons, places, and historical events through age-appropriate literary selections.

*"Always be prepared to give an answer...with gentleness and respect."* (1 Peter 3:15) We intend to take full advantage of the unique opportunities provided by a group setting. Older students will be trained and challenged to model leadership and present in-depth research to younger students and peers.

*"Iron sharpens iron."* (Proverbs 27:17) Overwrought parent-educators will find support in a framework of lesson plans, encouragement, and accountability. Parents participate in classroom training and so gain a keen understanding of student assignments and expectations.
